Election/Restrictions

1. This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1. In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group 1, claim(s) 1-10 drawn to a method of diagnosing or prognosticating.

Group 2, claim 11, drawn to a kit for diagnosing.

Group 3, claim(s) 12 drawn to a method of treating.

Group 4, claim(s) 13-17 (in part), drawn to a modulator of the gene encoding SCN2A.

Group 5, claim(s) 13-17 (in part), drawn to a modulator of the transcription product of SCN2A.

Group 6, claim(s) 13-17 (in part), drawn to a modulator of the translation product of SCN2A.

Group 7, claim 18 drawn to a transgenic animal expressing SCN2A.

Group 8, claim 19 drawn to the use of a transgenic animal expressing SCN2A.

Group 9, claim(s) 20, 23-24 drawn to an in vitro assay to screen for modulators of SCN2A.

Group 10, claims 21-22 drawn to an in vivo assay to screen for modulators of SCN2A.

Group 11, claim(s) 25-27, drawn to methods of producing medicaments.

Group 12, claim(s) 28-29, drawn to medicaments.

Group 13, claim(s) 30-31, drawn to the protein SCN2A.

Group 14, claim 32, drawn to use of an antibody to SCN2A.

2. This PCT rule defines special technical features as technical features that identify a contribution which each of the claimed inventions, considered as a whole, makes over prior art. The inventions listed as Groups I-14 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Kearney et al. determine the level of activity of SCN2A in wild-type versus mutant rats (see Figure 1, page 308) and find an increase in persistent current with stimulation in the mutant. The mutant results in seizure, which is a neurodegenerative disease (see page 312, figure 4). Therefore claims 1-10 lack a special technical feature in common with claims 11-32 and cannot share one with the other claims.

3. The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and a product claim is subsequently found allowable, withdrawn process claims that depend from or otherwise include all the limitations of the allowable product claim will be rejoined in accordance with the provisions of MPEP § 821.04. **Process claims that depend from or**

otherwise include all the limitations of the patentable product will be entered as a matter of right if the amendment is presented prior to final rejection or allowance, whichever is earlier. Amendments submitted after final rejection is governed by 37 CFR 1.116; amendments submitted after allowance is governed by 37 CFR 1.312.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103, and 112. Until an elected product claim is found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowed product claim will not be rejoined. See "Guidance on Treatment of Product and Process Claims in light of *In re Ochiai*, *In re Brouwer* and 35 U.S.C. § 103(b)," 1184 O.G. 86 (March 26, 1996). Additionally, in order to retain the right to rejoinder in accordance with the above policy, Applicant is advised that the process claims should be amended during prosecution either to maintain dependency on the product claims or to otherwise include the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.**

Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
